

DocAve for Office 365

Migrate. Integrate. Manage. Optimise. Protect. Report.

Migrate. Automate Microsoft® SharePoint® 2010 content publishing to Microsoft® Office 365, deliver global collaboration and provide business continuity across hybrid SharePoint environments.

Key Benefits

- Seamlessly migrate existing SharePoint 2010 content to Office 365 – SharePoint Online for unified enterprise content management
- Minimise business disruption during migration projects
- Publish SharePoint content from on-premise staging to online production farms for global scalability and enhanced disaster recovery
- Manage hybrid SharePoint on-premise and online deployments with unified policies

Migrate or publish SharePoint 2010 content to online SharePoint environments with ease.

Migrate, Publish and Manage SharePoint Online Content

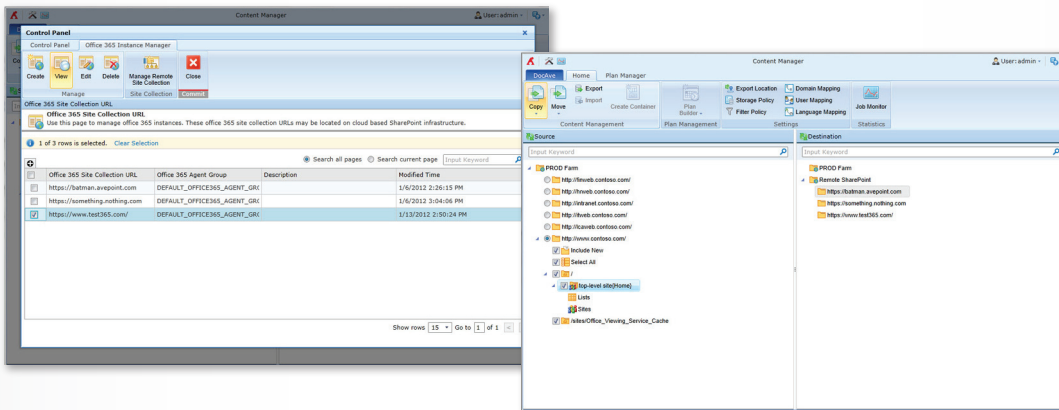

Organisations looking to deploy Office 365 to optimise SharePoint’s scalability, user productivity and infrastructure resources are faced with the daunting challenge of transferring existing enterprise content to the cloud to quickly gain value from their investment. DocAve for Office 365 - SharePoint Online helps organisations migrate existing content to the cloud, as well as maintain platform co-existence between on-premise staging and online production farms in order to minimise interruptions to user productivity.

Technical Overview

- Migrate or publish content – including items, attachments, documents, lists, libraries, sites and site collections – from on-premises SharePoint 2010 environments to SharePoint Online
- Quickly navigate to desired online destinations by manually inputting site, list, or folder URLs
- Perform content publication or migration tasks in real-time or on a schedule in order to keep environments in sync, periodically reflecting changes in on-premises environments in the cloud
- Ensure consistency between on-premises and online environments with graphical user mapping and support for configurations – including columns, content types, versions, views, navigation and security
- Leverage customisable migration and content publication options to selectively overwrite, append, or replace existing content with copied content
- Only migrate or publish content relevant to business needs with content selection filtering based on document properties
- Migrate or publish built-in SharePoint web parts to online environments
- Supports migration or publication of content externalised from Microsoft® SQL Server® databases with DocAve storage optimisation solutions, including DocAve Connector and Storage Manager

Migrate customised sites from SharePoint 2010 on-premise to Office 365, retaining all custom metadata, with ease.

AvePoint is a preferred Microsoft approved vendor for installation on Office 365 Dedicated servers after successfully completing the *Microsoft SharePoint Online Code Analysis Framework (MSOCAF)* testing. As with all AvePoint software, DocAve for Office 365 solutions leverage only fully supported Microsoft methodologies and APIs
